SUMMARY

Frontend-focused developer pursuing an MCA, with hands-on experience building responsive, interactive web applications using HTML, CSS, JavaScript, and React.js. Building strong foundations in Core Java and Data Structures & Algorithms, with a fast-learner mindset toward full-stack development. Looking for a 6-month internship to contribute to real projects and grow as an engineer.

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027 (Expected)

Veer Narmad South Gujarat University (VNSGU), Surat

Bachelor of Computer Applications (BCA)

2022 – 2025

Shree Uttar Gujarat BCA College, Surat (Affiliated to VNSGU) — CGPA: 7.48/10 (74.80%), First Class with Distinction

TECHNICAL SKILLS

Languages: Core Java, JavaScript (ES6+)

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Concepts: Data Structures & Algorithms, OOP, REST API Integration, Git Version Control

Tools & Platforms: Git, GitHub, VS Code, LeetCode, AI-assisted development tools (ChatGPT, Claude)

Core Strengths: Problem solving, fast learner, adaptable to new tech stacks, team collaboration

PROJECTS

Kanban Task Manager

HTML, CSS, JavaScript

Individual Project

Repo: github.com/Krishipatel29/kanban-board | **Live Demo:** krishipatel29.github.io/kanban-board

- Developed a Kanban-style task management application from scratch using vanilla JavaScript, HTML, and CSS.
- Implemented task creation, editing, deletion, search/filtering, and drag-and-drop functionality across To Do, In Progress, and Done columns.
- Integrated Local Storage for persistent task data and dynamic task-count updates.
- Designed a responsive, interactive UI with modal forms, validation, delete confirmation, and hover/drag interactions.

RedFlag – Message Risk Scanner

React.js, JavaScript

Individual Project

Repo: github.com/Krishipatel29/RedFlag_React | **Live Demo:** krishipatel29.github.io/RedFlag_React

- Built a rule-based phishing/scam message scanner in React that flags urgency language, credential requests, lookalike domains, link shorteners, and other social-engineering patterns.
- Designed a weighted scoring engine that classifies messages as Cleared, Flagged, or High Risk, and renders an annotated view highlighting exactly which phrases triggered each rule.
- Structured the app around React state-lifting (useState/useEffect) with a case log that persists scan history to Local Storage, keeping all detection logic entirely client-side.
- Built with Vite, deployed the production build to GitHub Pages, and version-controlled the codebase on GitHub.

LEADERSHIP & EXTRACURRICULAR

Event Lead — Inter-College Fest

Shree Uttar Gujarat BCA College

- Led and organized a first-of-its-kind inter-college competition at the college, coordinating a wide range of brain, dance, and group activities for participants from multiple colleges.
- Managed end-to-end event execution as team lead, including planning, on-ground coordination, and social media promotion, delivering a successful event from concept to completion.

CERTIFICATIONS

- AI Tools & ChatGPT Workshop — be10x (May 2026)
